RESILUX FURTHER INVESTS WITH CONFIDENCE IN BUILDING OUT IT'S
POSITION IN THE GREEK AND BALKAN MARKET.

With the support of the Resilux Group, Resilux Hellas has managed to every extent possible to face up to the difficult circumstances under which it had to operate during the 2008 summer season, following the earth quake that it sustained on June 8, 2008. The impact of the sinister shall have no negative influence on the financial results of the second semester 2008 of the Resilux Group.

In the mean time, the Resilux group and local management has decided on all appropriate actions required to restore the Greek subsidiary's production capacity, required to meet the market demand on a yearly basis, and to further invest with confidence in its future expansion in the Greek and Balkan market.

Consequently, Resilux Hellas is not only able to assure its customers the optimal local production capacity, required to meet the market demands for the coming months. During this period, Resilux shall also initiate and finalise all necessary actions required to restore by the end of 2008 the Greek subsidiary's locally required production capacity, in order to be positioned to timely prepare the 2009 season and fully face its market demand.

In addition to the above, Resilux has decided to build at its Patras premises a new production building meeting the most recent seismic standards. The financing of this project, which should be completed by the end of 2009, has already been properly secured.

Resilux NV specialises in the manufacture and sales of PET preforms and bottles. These preforms and bottles are used for the packaging of water, soft drinks, oils, etc. Resilux originally was a family business, and was established in 1994. Since 3rd October 1997, Resilux has been quoted on Euronext Brussels. Resilux has production units in Belgium, Spain, Greece, Russia, Switzerland, Hungary and in the U.S.A.
